WEATHER OF CONCERN

Weather of Concern

- Hazardous mountain travel likely with chain controls, delays, accidents, and white-out conditions at times. Gusty winds will accompany the storm with the likelihood of additional power outages and wind damage. Localized flooding possible near streams and poorly drained urban areas. Dry period after Tuesday through at least the end of next week.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

A vigorous low west of the Oregon coast will keep Northwest California wet and unsettled through Monday. The strongest and most damaging winds with this storm have ended, however locally windy conditions are expected primarily over the ridges and near the coast through Monday. Dry conditions and much lighter winds are expected for Tuesday.

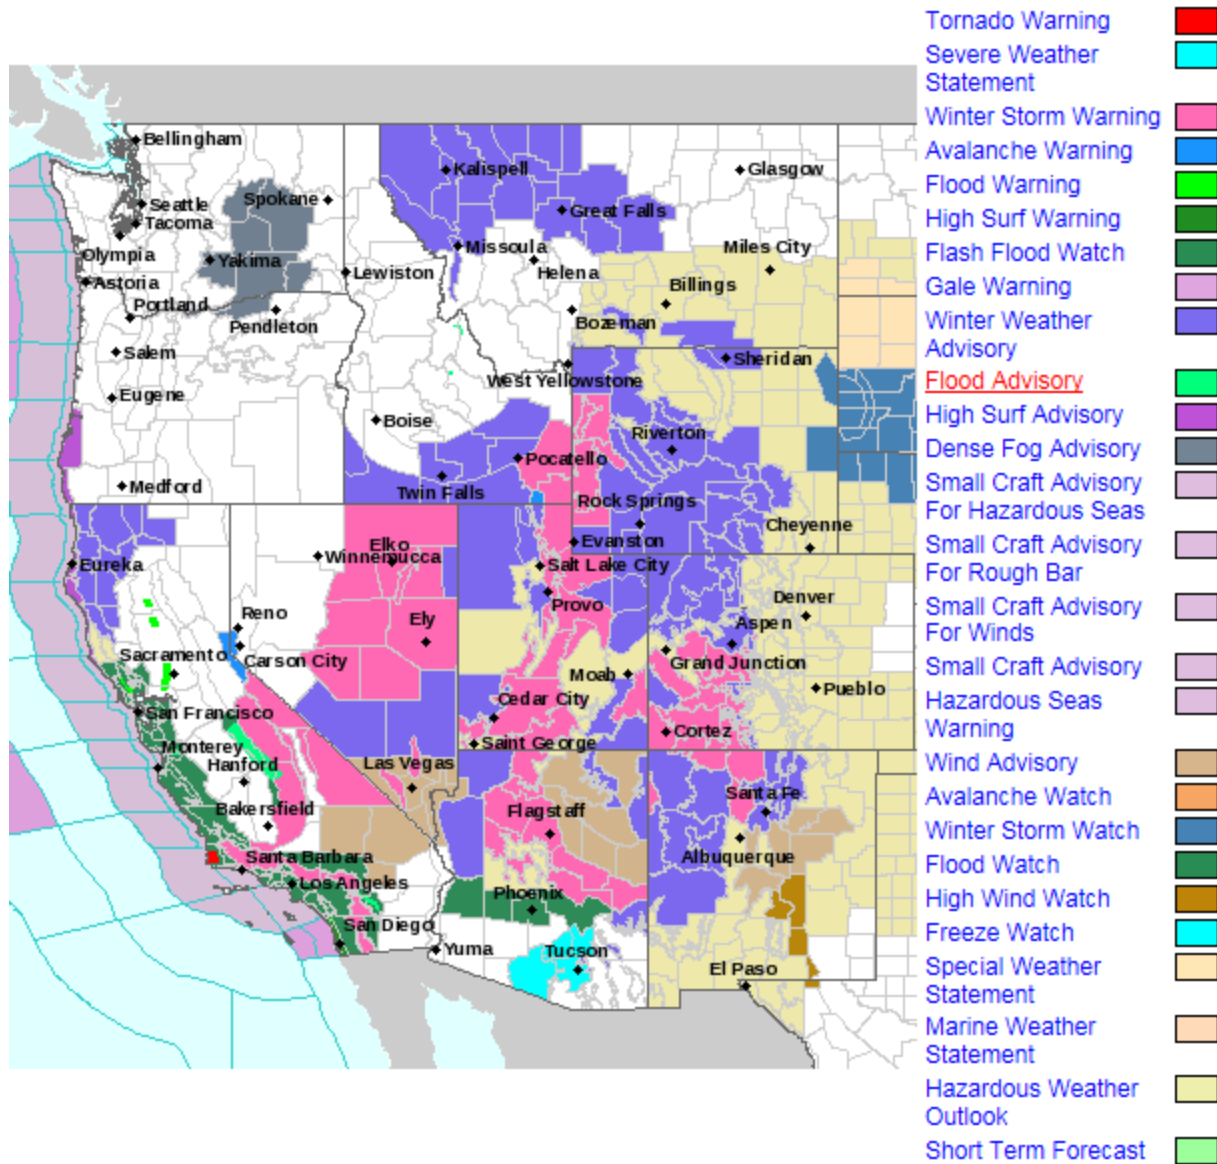

For the Sacramento Valley, showers and isolated thunderstorms continue today and Monday. Drier weather Tuesday into the weekend except for a slight chance of some light mountain showers midweek.

Strong winds and heavy snow will continue to create hazardous travel in the Sierra tonight along with high avalanche danger in the backcountry.

SOUTHERN CALIFORNIA

The third and final storm in a series of storms will impact southwest California through Monday. This will be the strongest storm of the three, and possibly the strongest storm southwest California has seen in several years. Coastal and valley areas will likely receive 2-4" of rain, with 3-6" in the foothills and mountains along south-facing slopes. Locally higher amounts will be possible. Widespread heavy rain is expected today, with showers and isolated thunderstorms continuing into Monday. Snow levels will initially be above 8000 feet, but will likely lower to around 4000 feet late Sunday night and Monday. Strong southerly winds are expected today as well, especially across higher terrain. Potential impacts with this storm include flash flooding and debris flows for burn areas, rock and mudslides along canyon roads, urban and small stream flooding, significant travel delays, numerous downed trees and isolated power outages, and dangerous winter driving conditions in the mountains, especially tonight and Monday when the Grapevine could be affected.
